

2023 Summer Camps

June 19-23

Deadline to Register: June 1, 2023

Explore the Land Down Under!

Current Kindergarten to 2nd Graders

9:00am -3:00pm \$350

Taught by Rita Gazewood (Learning Support Specialist)

Come on an adventure to the 'Land Down Under!' Discover what makes Australia such an amazing place! We will immerse ourselves in ancient aboriginal legends. We will put on your scientific goggles to view and learn about the varied creatures found in Australia and grasp why they developed so uniquely. We will dive into the deep and explore the beauty of the Great Barrier Reef. Of course, no journey is complete without music and art. Through our experience with traditional aboriginal art we will be inspired to create ourselves. Adventure Awaits!

Science Skillz / Cooking with Joanne

Current 2nd-5th Graders

9:00am – 3:00pm \$350

Taught by Stacy Kunst (Science teacher)

Joanne Simpson (Kindergarten teacher)

**** New curriculum ****

New and returning students are welcome!

Experiment with physical and chemical transformations, spending half the day on science experiments and half the day on kitchen creations. Challenge your student's knowledge of physics and scientific reasoning through cool chemistry, studying animal phyla, and puzzles. Continue your student's STEAM skills in the kitchen, with lots of practice measuring, transforming ingredients, then enjoy your hard work!

Art Through the Seasons

Current 1st-4th Graders

9:00am – 3:00pm \$350

Taught by Rachel Hoch (3rd grade teacher)

Come spend a week creating art projects that reflect the four seasons! We'll be using different media and different artists to inspire our creativity. Each day will focus on one of the four seasons. As we work, we will also enjoy music that reflects and invites us to experience the seasons in a new way.
